Karen Strassman was recently seen as a recurring guest star on **PREACHER**, **BOSCH**, & **SILICON VALLEY**. Just shot exciting new role in an upcoming Horror Anthology series (TBA) and is a lead in Director Tom Six's controversial movie **THE ONANIA CLUB** set to premiere in 2019.

Karen Strassman is an actress, voice-over artist and dialect coach, known the world over for hundreds of characters she has created in many forms. She enjoys crafting characters that touch the human spirit and mirror the beauty, quirkiness, challenging realities and exquisiteness of the world we live in.

Whether on-camera or behind a mic, Karen is extremely versatile. Recently seen as the devious German scientist on *PREACHER*, the unscrupulous & calculating lawyer on *SILICON VALLEY* and the overburdened French military mechanic Maria Laurent in *WOLFENSTEIN II*, she is known for creating unique and powerful characters. She has played roles as varied as the brilliant and empathic scientist Devra Bogdanovich in *INGRESS*, a dying immigrant from Northern Ireland, doctors and lawyers, the quirky bookish OCD accountant on *WEEDS*, to a killer's trailer trash mother on *CRIMINAL MINDS*. Upcoming roles include an appearance on *S.W.A.T.*, a recurring role as the driven public defender Laura Tribe on *BOSCH* and a lead in the long awaited release of Director Tom Six's highly anticipated daring movie, *THE ONANIA CLUB*.

Karen has created hundreds of voice-over characters of all shapes, sizes, genders, ages, and species, from classic Disney princesses, to iconic villainesses, to talking jellyfish and shy tadpoles. Her extensive range of characters spans the voiceover world of cartoons, animation and video games; from the teenage rockstar Catty Noire on *MONSTER HIGH*, the beloved little girl Olivia on *LEGO FRIENDS*, sexy

Rouge the Bat in *SONIC THE HEDGEHOG*, Chromie, the charismatic gnome that turns into a dragon from *WORLD OF WARCRAFT* and *HEROES OF THE STORM*, to the iconic Mileena & Kitana in *MORTAL KOMBAT*. And then there are projects like the Nicktoons series, *MONSUNO*, voiced by an ensemble cast of five actors, where Karen not only played the teenage female lead, Jinja, but she also voiced every other female character in all three seasons of the show (last count there were 26 characters).

Karen has dual American/French nationality. She spent almost half her life in France and is fluent in French (although she's also worked in German, Spanish, Danish, Italian and Yucatec!). In France, Karen studied acting at the prestigious Conservatoire National Supérieur d'Art Dramatique in Paris, and also began her dialect coaching career there, teaching classes at the well-known STUDIO VO/VF and coaching famous French actors in their homes and on-set. She soon got into TV, film & voiceover, and continued to dive into as much theatre as she could, both in English and in French.

On-camera in France, Karen has shot films in all kinds of locations throughout Europe, from many artsy little indie projects, as well as big productions, working with icons like Gerard Depardieu, Jan Kounen, Polanski and Merchant & Ivory. She also appeared in many of the popular French TV series at that time.

Her major clients have included: Disney, HBO, Sony, Universal Pictures, Warner Brothers, Microsoft, Nickelodeon, Nicktoons, Cartoon Network, Sci-Fi, Showtime, The CW, CBS, Hulu, Amazon Prime, AMC, Netflix, Klasky-Csupo, Viacom, THQ, Bandai, Atlus, Volition, Namco, Pioneer, Konami, Vivendi, VU Games, Square Enix Co, Blizzard, Electronic Arts, Ubisoft, Technicolor, Disneyland, Lancôme, L'Oréal, Clarins, Vidal Sassoon, Acura, Kia, Hallmark, Mattel and Diet Coke.

WOMEN'S EMPOWERMENT

Karen Strassman
Actress and voiceover artist

"We know, for everyone you meet is fighting a battle you knew nothing about."

Karen Strassman, Country: There are so many that I try to express into my daily life as I navigate our ever changing world. As a child growing up in Washington D.C., I was drawn to writing, that allowed my creative side to thrive, drawing, reading comic books, performing to cover almost anything. What high school? It would be Justice League, parenting a personal career and helping continue what I knew to make psychology and drama at John Jay College. During my junior year I focused on opportunity to study abroad in France, selecting that would change the course of my life, and we can do more. While there, I immersed myself in a company looking for a children's book series to help French kids learn to speak with a American accents their TV and film was. Since they offered me a billion dollars and I also started working as a counselor as well as French TV and film producer. Playing the powerful role as a psychologist while I began exploring all the opportunities we creative folks could offer. I started teaching both stage and I continue to find new joy in the film I have fresh everyday. It was so clear a lot of the ways I've found to make my life and hope they provide so much inspiration to you as they have to me.

London, UK: More often will you work in the country of a non-English speaking or English, or because it doesn't require much thought after doing it so long. I encourage people to get out of their comfort and step out of their comfort zones. I think anyone who has the opportunity to travel, travel the R.E. Starting makes places and situations really special experiences in this world as a child. When I moved to London, I found it changed me. We, I mean moving away from friends, and had to make through daily life with just the basic car for commuting and beautiful in a way. I made choices to explore, learning Culture and Racism, and French accents, which was educational and beneficial, even if the traveling often required me. I am exploring cultures and psychology, deeply understanding the full of it. When you are international like, you are forced to take less. When you live in a foreign country, it is usually only open to us to be at peace in every moment of daily life, because everything is new, different, and interesting. You become immersed with the sense of everything. But a child of one again, if traveling isn't an option for you, that's something that shouldn't prevent you, take culture, infinite a trip for less by re-creating a new one. There is no such word as "option" and be compelled by

Hudson River: Like the lyrics of the song says, I always try my best to be kind to those around me. To be positive to others, sometimes I feel extremely tired, I recognize that we are all wounded. We are all imperfectly broken, just trying our best to get through each day. It might seem as though we could just go along with it, or responding somehow. When I was working on *Phantom*, we moved due to a fire at the theater, I got a room from Julie Ann Morris who I have never seen, and didn't even have any contact info, informing me to an old fashioned she had seen the shelter and she was most broken girl. She wrote about this. She had absolutely nothing longer than, maybe a sentence. Nothing to give out of this connection personally. This could teach us that we are all in some place in our life out to make her feel welcomed, one person, and great. I think that is what empowerment is all about, in creating someone allowing to explore another person's view of the home, working toward to gain them. I think, experiencing other humans brings a reminder that growth and spreads through each soul and it is so very powerful that we experience good growth. Every bit of the philosophy, acts for that example.

Local & Helping Hand: One of the things that brings me the most joy helping local community. I started an organization called that would find my own projects, and give something to someone with more difficult needs, to someone outside of what is my living. However, because a little deeper was a little more personal when I know the area something good for someone. I put a lot of things into perspective. My absolute favorite cause is helping in Cambodia. I have probably really learned about that provide resources and support for families and still build schools 10-15. I connect deeply with that kind of that the young people deserve education for their future to live by. I also support other organizations like CARE, Partners in Health, and Oxfam.

I offer these suggestions to you, because that is all cause you truly depend on before being involved in. It is not writing me off, I'm determined.

Karen Strassman: I am an accomplished actress with decades of film, television, and voiceover credits in her career. She has most recently been seen in *DC's Legends of Tomorrow* on the CW, *ABC's Once Upon a Time*, *ABC's The Blacklist*, *The Flash*, *ABC's Quantico*, *ABC's The Resident*, *ABC's The Good Doctor*, and the upcoming feature film *Onward*.
